Dear Talent Scout,

As a recent graduate with 4 years of programming education from the University of Texas at San Antonio, I am interested in the Software Engineer or Data Engineer position. I feel I can bring a positive and enthusiastic energy to your team and would love to be given the opportunity to prove it.

As a recent graduate, I do not have much professional experience in the field of programming, but I do have some passion projects that I have worked on. I have developed multiple unpublished indie games utilizing both the Unity engine and the Unreal engine. I am proficient in the programming languages of Java and Python, and familiar with HTML, C, and CSS, with certifications pending for Java and Python. I am also certified in Microsoft Word and Excel 2017.

In addition to my programming experience, I have experience as a front-end leader and sales specialist for Home Depot. I was a part of the company for over 2 years and worked the supervisory positions for a year and a half.

Please review my attached resume for additional details regarding my experience and education. Do not hesitate to reach out if you have any questions or need further clarification on my experience. I would love to meet with you and discuss this position in detail.

Thank you for your consideration.

Sincerely,

Dylan Armstrong
